- A multi-backlight system comprising a plurality of fifth coil sets and a plurality of fourth lamps, wherein numbers of coils of the fifth coil sets are substantially the same, the fifth coil sets are symmetrically disposed on first and second sides of the first and fourth coil sets so that the first and fourth coil sets are disposed between the fifth coil sets, the first AC voltage applied to the first coil set induces a seventh AC voltage on each of the fifth coil sets, and the fourth lamps are supplied with power by the seventh AC voltages, in combination with the remaining claimed limitations as called for in independent claim 11.
